General Announcements

Autism Acceptance Month- Dr Stephen Shore once said, “When you meet one person with Autism, you’ve met one person with Autism”. This quote highlights the diversity of Autism. Autism is a lifelong neurodevelopmental condition that affects how people communicate, interact with and experience the world. It is simply a different way of being. The term spectrum reflects the unique strengths and challenges autistic individuals have; no two people will experience autism the same. For more information regarding ASD, visit autismalberta.ca
